EcoFest

March 1, 2020 from 11 a.m. to 4 p.m.

Our Planet = Our Health

Located on a 64 acre lagoon island, the ELC offers environmental education programs, outdoor activities and water sports, as well as an interactive Discovery Station with aquariums and exhibits. EcoFest is the annual 'open house' event hosted at the ELC that is free and open to the public in order to raise awareness of the benefits of spending time in nature, environmental issues and prevention of and solutions to those issues. The theme for the 2020 EcoFest is 'Our Planet, Our Health' and will focus on the human connection to the natural world and how the health of the environment is directly associated with the health of humanity.

Past EcoFest events have drawn thousands of people to the ELC for a day of fun and learning for the whole family. Attractions include outside exhibitors from the local community with information on how their organizations work to protect and conserve our environment, activities that engage participants in learning, workshops for adults on nature related interests and eco talks to inspire environmental action.

In 2020 we plan to make EcoFest bigger and better than ever with a greater focus on solutions to environmental and human health issues by offering activities focused on citizen science, wellness programs, and prevention of harmful human impacts on the environment. There will also be a small market where participants can shop for ecofriendly and locally made products. The theme of our event will be highlighted through interpretive signage throughout the campus.

By becoming a sponsor, exhibitor or vendor, your brand will gain valuable recognition from your participation in this environmentally minded event. Hundreds of visitors from the Treasure and Space coasts will have the opportunity to learn more about your product or service, providing you a new audience and increased market reach. Show how much you care about a healthy environment by participating in EcoFest 2020!
